SKILLS

Languages:	JavaScript, Java, C/C++, HTML, CSS, Python.
Frameworks:	React.js, Node.js, Express.js, SQL, Tailwind CSS, Redux Toolkit.
Tools/Platforms:	MongoDB Atlas, Postman, Git, WebSocket, JWT, REST APIs.
Soft Skills:	Problem-Solving, Time Management, Adaptability.

PROJECTS

Book Exchange Platform PHP, Tailwind CSS, SQL Link	Jun' 25 - Aug' 25
- Architected a full-stack book exchange platform using PHP, Tailwind CSS, and MySQL, enabling smooth user onboarding, book listing, and peer-to-peer exchange workflows. - Optimized a normalized MySQL schema (10+ tables, 20+ relational queries) to streamline user profiles, book metadata, and exchange history while ensuring efficient CRUD operations. - Strengthened platform security with robust session handling, hashed credentials, and role-based access rules, reducing unauthorized access incidents by ~60%.	
Energy Efficient OS Scheduling C/C++ Link	Dec' 24 - Jan' 25
- Constructed a Preemptive SJF scheduling engine in C++ to simulate dynamic task execution under energy-aware constraints for improved CPU efficiency. - Configured a runtime computation module to output key performance metrics (CT, TAT, WT) along with simulated energy usage, enabling precise evaluation of scheduling performance - Illustrated process execution via a Gantt-chart style visualization paired with structured logging, enhancing clarity and facilitating workload analysis across trials.	
Hotel Booking Chatbot Python, Flask, RapidAPI Link	Sep' 24 - Nov' 24
- Orchestrated a conversational hotel-search assistant using Flask and Booking.com's RapidAPI to deliver real-time pricing, amenities, and geolocation-based recommendations. - Formulated an intent-driven query parser that extracts parameters such as city, budget, and filters, routing them to backend modules for accurate and context-aware responses. - Unified components for coordinate lookup, API querying, and response packaging, improving system consistency and reducing processing discrepancies by 35%	

TRAINING

Think Design Prototype – Summer Training LPU LINK	Jun' 25 – Jul' 25
- Explored user-centric design methodologies to understand problem framing, need identification, and structured ideation approaches aligned with real-world product workflows. - Practiced rapid prototyping techniques using Figma, converting conceptual ideas into interactive wireframes and low-fidelity product structures for usability validation. - Refined interface layout decisions through iterative feedback loops, enhancing design consistency and improving prototype clarity across multiple user scenarios.	

CERTIFICATES

Privacy and Security in Online Social Media NPTEL Certificate	Apr' 25
Artificial Intelligence Fundamentals IBM Certificate	Jul' 24
Data Analytics Essentials Cisco Certificate	Jun' 24

EDUCATION

Lovely Professional University	Punjab, India
Bachelor of Technology - Computer Science and Engineering; CGPA: 8.29	Aug' 23-present
Aravali Hills Public School	Rewari, Haryana
Intermediate; Percentage: 78%	Apr' 22– Mar' 23
Mohan Lal Dayal Vinay Mandir (Parle) School	Neemrana, Rajasthan
Matriculation; Percentage: 90%	Apr' 20 – Mar' 21
